CUSTOMER SUCCESS MANAGER

PROFESSIONAL SUMMARY

Customer Success Manager with 6+ years owning portfolios of 50+ technical product accounts end-to-end — onboarding, renewals, expansion, and Quarterly Business Reviews. Track record: 95% client satisfaction, 15% revenue expansion, 30% reduction in support escalations, and improved Net Revenue Retention across SaaS, API, and developer-tool deployments. High-agency operator who spots account problems, forms a view, and acts — equally comfortable in C-level executive conversations and digging into APIs, data flows, and integration work alongside customer engineers. Comfortable across pricing, renewal, and upsell conversations; experienced in regulated, compliance-heavy SaaS environments and early-stage product cycles. Active builder of AI tools that enhance CS efficiency.

CORE COMPETENCIES

Customer Success Management • Enterprise Account Management • Account Portfolio Ownership (25–50+ accounts) • Onboarding & Time-to-Value • Quarterly Business Reviews (QBR) • Renewals • Expansion & Upsell • Cross-Sell • Net Revenue Retention (NRR) • Customer Health Scoring • Churn Reduction • Customer Advocacy • Voice of the Customer • Technical Product Expertise • API Integrations • Developer-Tool Customers • Data Platforms • Pricing & Commercial Conversations • C-Level Executive Communication • Digital Health-Adjacent SaaS • Early-Stage SaaS • AI-Powered CS Tooling • Cross-Functional Stakeholder Management • High Agency / High-Agency Ownership

TECHNICAL SKILLS

Customer Success Platforms: Salesforce, HubSpot, ServiceNow, Jira, Gainsight (familiar)

Languages & Frameworks: Python (FastAPI), TypeScript, React, Next.js, Node.js, REST APIs, WebSocket, JSON, Git, HTML/CSS

Data & Backend: PostgreSQL, JSON data pipelines, REST API integration, data analysis

Cloud & Infrastructure: AWS, Google Cloud Platform (GCP), Azure, Docker, Kubernetes, Linux, Vercel

AI & Automation: LLM-driven CS workflows, OpenAI/Anthropic APIs, Zapier, Make (Integromat), n8n, Python automations

Domains: Regulated SaaS, Healthcare & Digital Health-Adjacent Compliance, Developer Tools, Data Platforms, Fintech, Enterprise SaaS, Network Security

PROFESSIONAL EXPERIENCE

Customer Success Manager / Customer Engineer Advocate — Everi Holdings Inc

Las Vegas, NV (Remote, EST-aligned) | Dec 2020 – Present

- Owned an enterprise account management portfolio that grew from 20 to 50+ accounts as the primary technical Customer Success Manager, maintaining 95% satisfaction and improving Net Revenue Retention (NRR) across the portfolio
- Drove 15% revenue expansion by identifying upsell and cross-sell opportunities through Quarterly Business Reviews with C-level executives; led pricing, renewal, and expansion conversations end-to-end
- Accelerated time-to-value for new accounts by rebuilding onboarding playbooks, kickoff cadences, and shared success criteria — cut launch times and eliminated slow-rollout escalations
- Served as technical product expert for a SaaS + on-premise platform: scoped API integrations, advised on data flows, and resolved compliance and integration questions directly with customer engineers
- Built customer health scoring and churn-risk monitoring using usage data and engagement signals, reducing monthly support ticket volume 30% (~200 → ~140) and surfacing at-risk accounts proactively
- Acted as internal voice-of-the-customer — surfaced patterns, frustrations, and feature gaps to Product and Engineering, shaping roadmap priorities for the highest-impact accounts
- Built AI-driven CS automations (LLM-powered reporting, Zapier/n8n workflows, custom Python tools) that compressed account reporting from 4 hours to 5 minutes per account, freeing time for strategic customer conversations
- Maintained zero security incidents across all managed accounts over 5+ years through proactive vulnerability assessment and compliance-aligned integration design

DevOps Engineer (Concurrent Contract) — Thermo Fisher Scientific

Remote | Feb 2019 – Mar 2021

- Built 12+ CI/CD pipelines (Jenkins, GitHub Actions) and managed cloud infrastructure (AWS, Azure, GCP, Docker, Kubernetes, Terraform) for 50+ microservices — technical fluency that informs how I support API and developer-tool customers today
- Authored 30+ runbooks and technical documentation pages adopted by 4 engineering teams, reducing new-engineer onboarding time

System Administrator — Persona

The Bronx, NY (Hybrid) | Aug 2016 – Feb 2019

- Managed 100+ production systems at 99.9% uptime with 15-minute average incident resolution as Tier 3 escalation point
- Automated monitoring workflows that reduced manual operations 50% (~20 hours/week saved)

Field Service Engineer — Nautilus Hyosung

The Bronx, NY | Jun 2015 – Aug 2016

- Delivered on-site technical support across 40+ client locations with 95% first-visit resolution; ranked #1 on team for customer satisfaction

PROJECTS

MAWA — Full-Stack AI Customer Success Assistant Platform | 2025 – Present

Python, TypeScript, React, REST APIs, WebSocket | github.com/syedfahimdev/mawa

- Built and use daily an AI assistant that automates CS workflows — account reporting, follow-up generation, ticket triage, knowledge retrieval — across 40+ tool integrations and 1,000+ daily API requests
- Real-world demonstration of how AI tools can enhance CS efficiency: cuts repetitive account work ~80% and frees time for strategic engagement

CornerRush — Early-Stage SaaS Platform | 2025 – Present

TypeScript, React, Vercel, AI Integration | cornerrush.com

- Built early-stage SaaS end-to-end as solo founder — AI audit wizard, quote calculator, lead-qualification voice agent (sub-2-second response); deployed on Vercel SSR with 90+ Lighthouse score
- Direct experience operating in early-stage product environments — pricing, customer discovery, onboarding, expansion all owned end-to-end

ToolsDNS — REST API Discovery Service | 2025 – Present

Python, REST APIs, JSON | github.com/syedfahimdev/ToolsDNS

- Built developer-facing discovery service indexing 5,000+ tools, returning structured JSON in under 200ms; reduces token consumption 98% in multi-tool AI environments

EDUCATION

Associate of Science — Computer Engineering Technology

Leading University • Bangladesh • June 2015

CERTIFICATIONS

AWS Cloud Practitioner • Oracle Cloud Infrastructure (OCI) Foundations • IBM DevOps & Software Engineering • Google IT Support Professional • Google IT Automation with Python • HubSpot (Inbound Marketing, CRM, Email Marketing, Sales Software) • Linux Foundation LFS101 • Atlassian Jira Fundamentals • Zapier Certified Expert • Make (Integromat) Certified

In Progress: CompTIA Security+, Siemens SCM Automation Engineer
